

The first AI doctor powered by the nervous system.

**She is 40. She
cannot stand up.
Eleven doctors
and \$300K later,
nobody has an
answer.**

POTS · Cannot stand

● Illustrative patient

He was 46, his labs were normal last year. She is 38, on her third IVF cycle. He is 23, three years on anxiety medication. Nobody measured the one system running all four.

40 · POTS · Cannot stand

46 · Cardiology · Heart attack

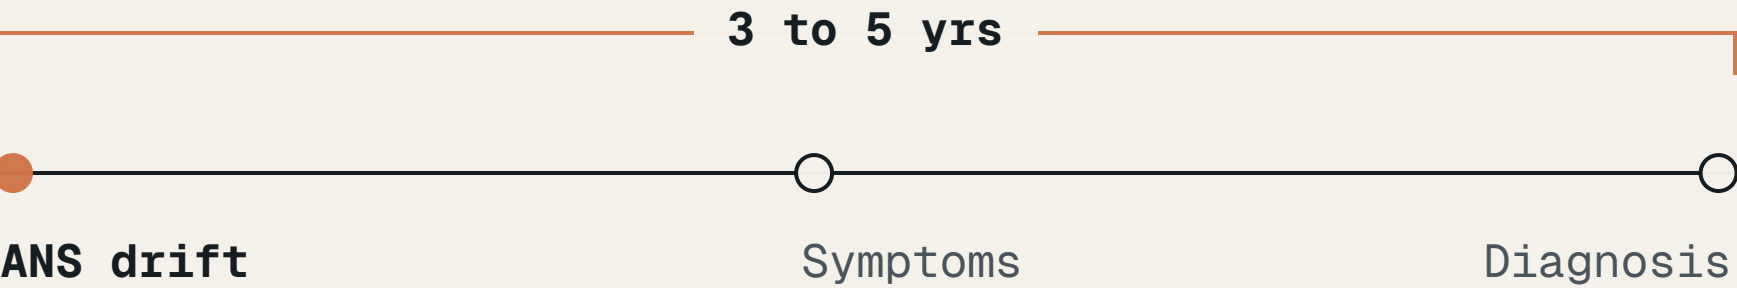

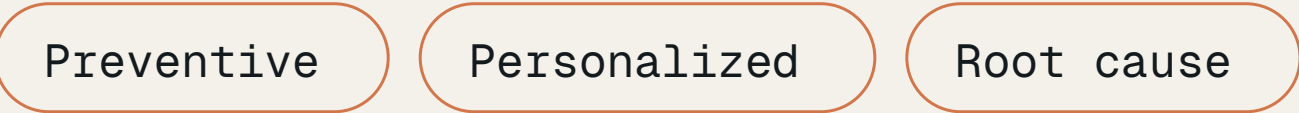

38 · Fertility · Third IVF cycle

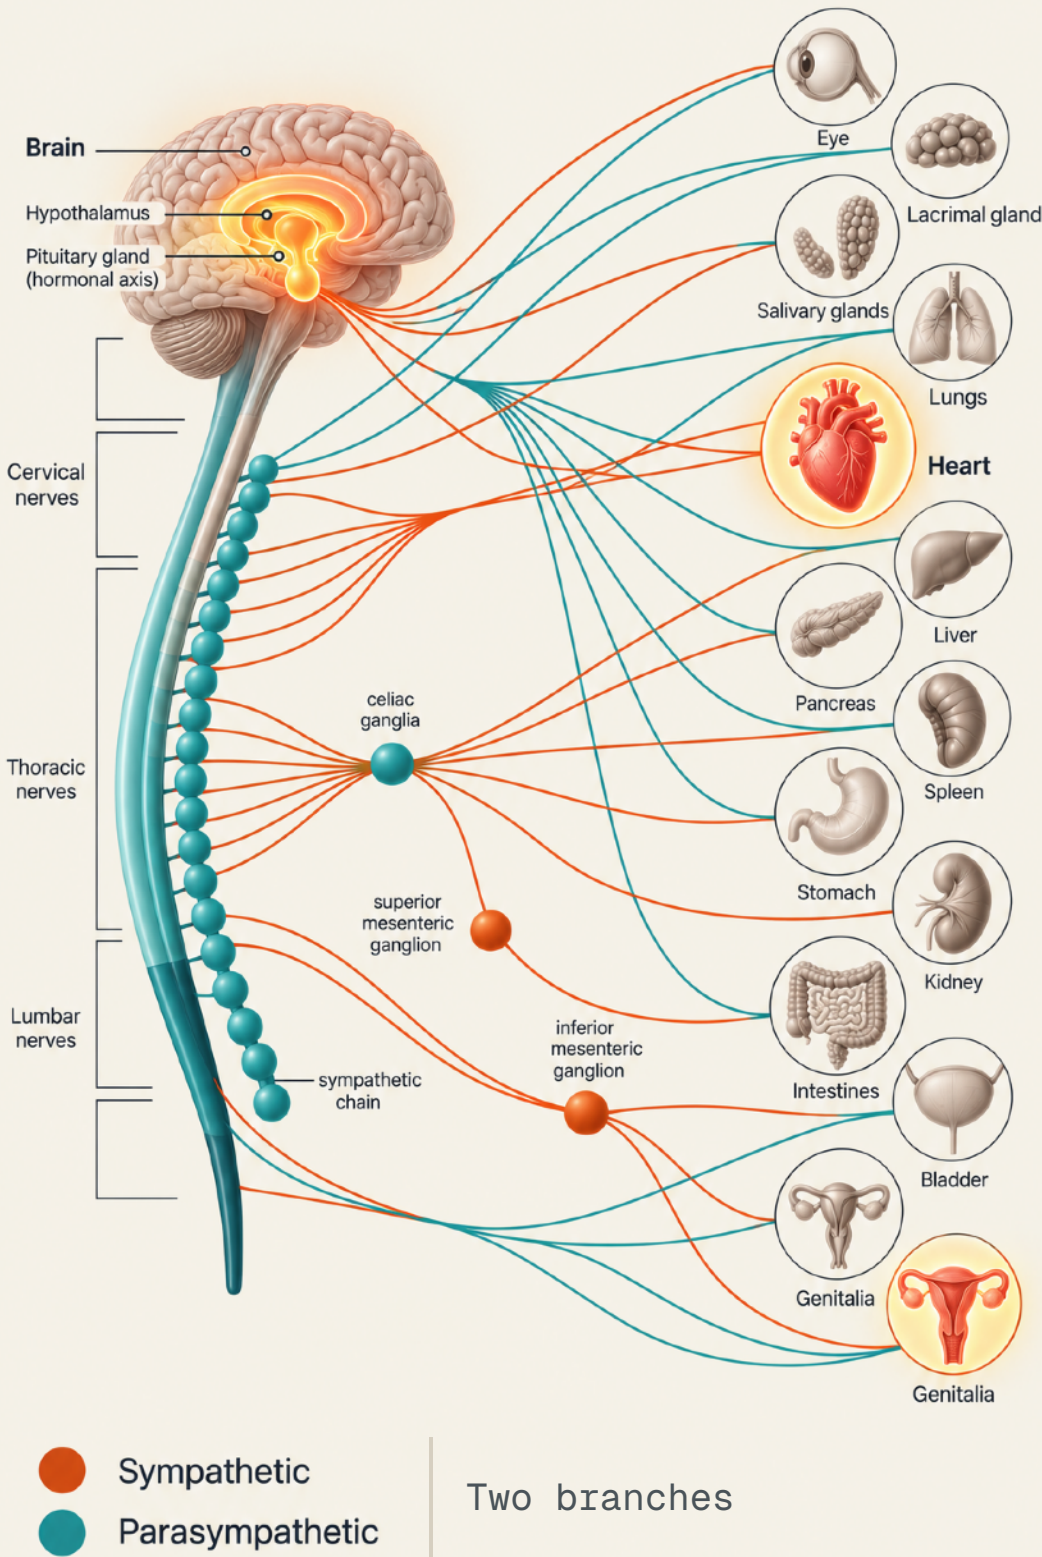

23 · Anxiety · 3 yrs on meds

One system runs the heart,
the hormones and the mind.
It drifts 3 to 5 years before
disease shows up in labs.

AUTONOMIC NERVOUS SYSTEM

Gold standard since 1986

TODAY'S GOLD STANDARD

05 / 13

Her gold
standard test is
a 1986 tilt table.
**It waits for her
to faint.**

For the other three, it is not measured at all.

Tilted upright

Watches the symptoms

Fainted = yes

Reading both branches took a \$30K machine, a technician and a specialist: only 700 clinics in 20 years. **Now it takes the watch she already wears.**

2006 · \$30K · clinic · technician · specialist

Today · \$2 sensor · home · 12 minutes · CDS

Wearables everywhere + AI good enough + CAJAL reads both branches from heart rate alone

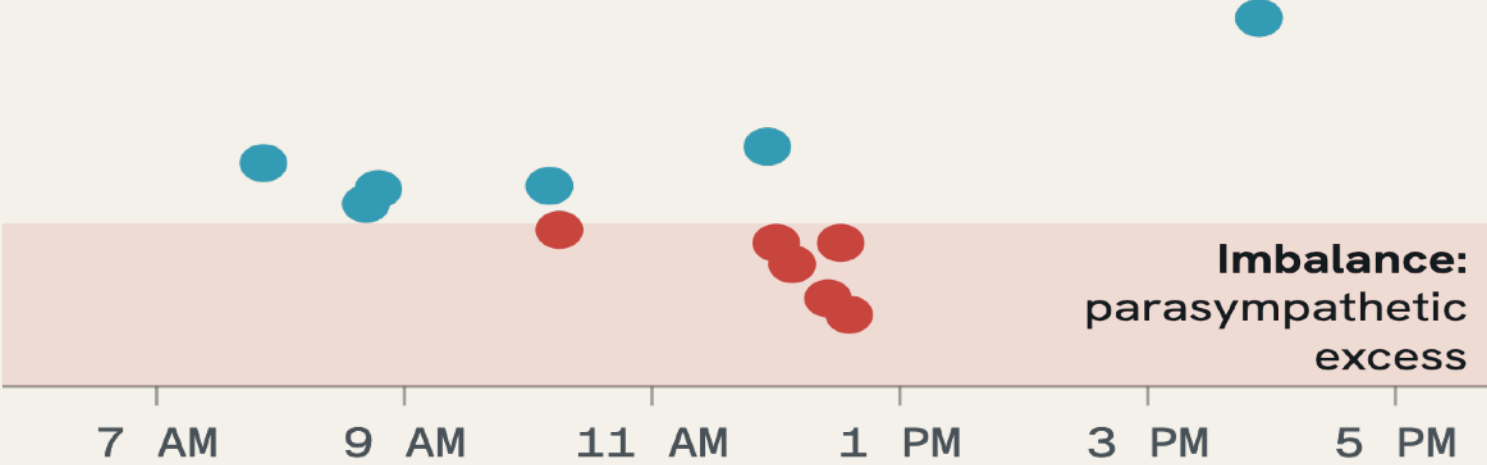

patent-pending

HRV says normal. The nervous system says otherwise.

Same person, same 12 hours, read two ways. Our co-founder, shared with consent.

HRV · one composite score · appears normal

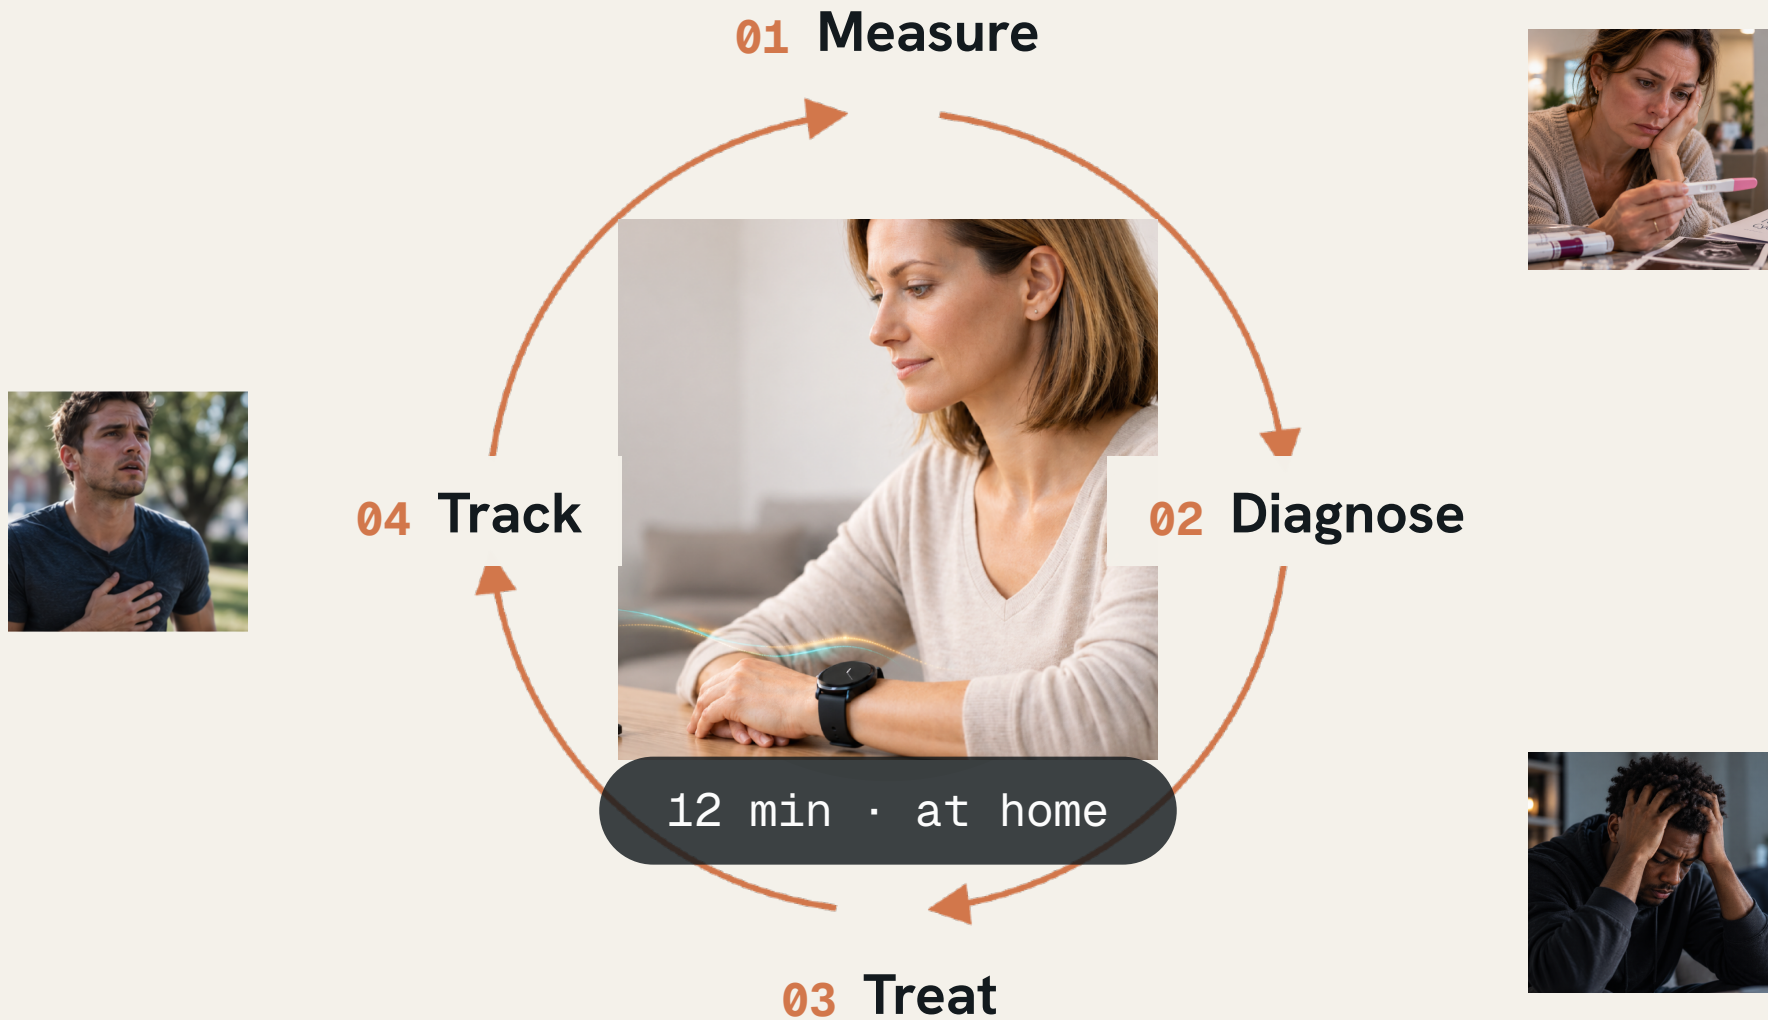

Autonomic Health · both branches · imbalance detected

Built on the only FDA-cleared branch-level measurement of the ANS: 1M+ patients, 700+ clinics, since 2006.

Recorded on our 24/7 monitoring prototype, our next product. Live today: the 12-minute at-home read with the AI clinician's care plan.

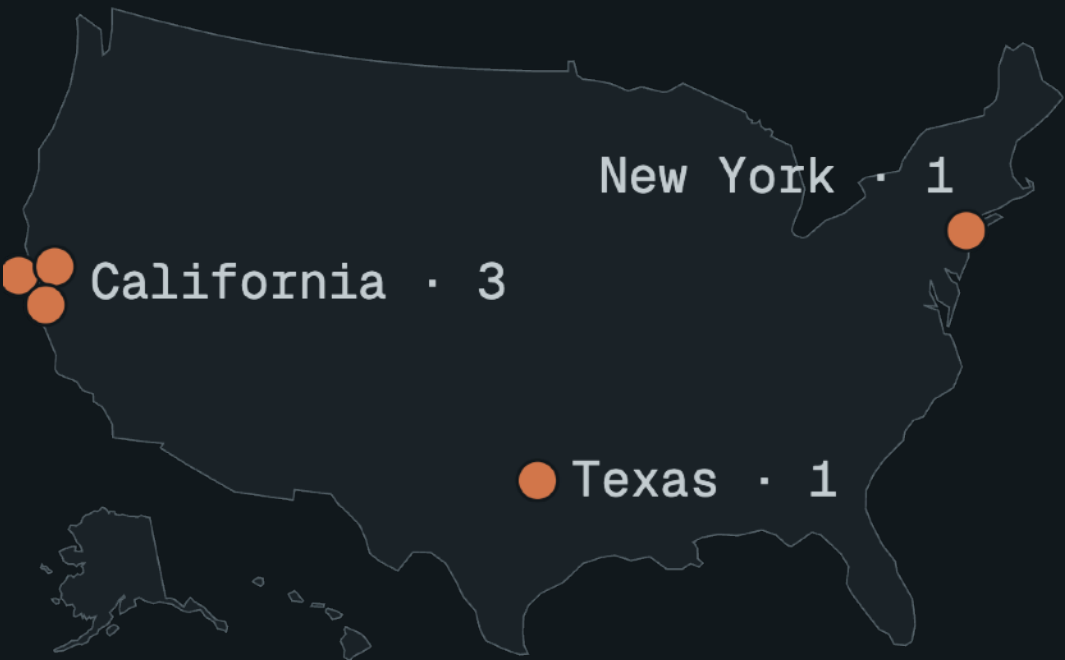

12 minutes at home. A diagnosis, a treatment plan, and a re-measure at 90 days.

CloudANS™, the platform.
CAJAL, the model.
The physician makes every call.

\$200 cash-pay test today · 24/7 monitoring next ·
delivered through clinics and platforms, Powered
by Autonomic Health

Five clinics live and paying. Physicians diagnosing and treating on it today. **The first patients re-measured at 90 days are improving.**

5

clinics live and paying

72

tests sold since the May launch
(as of Oct 14)

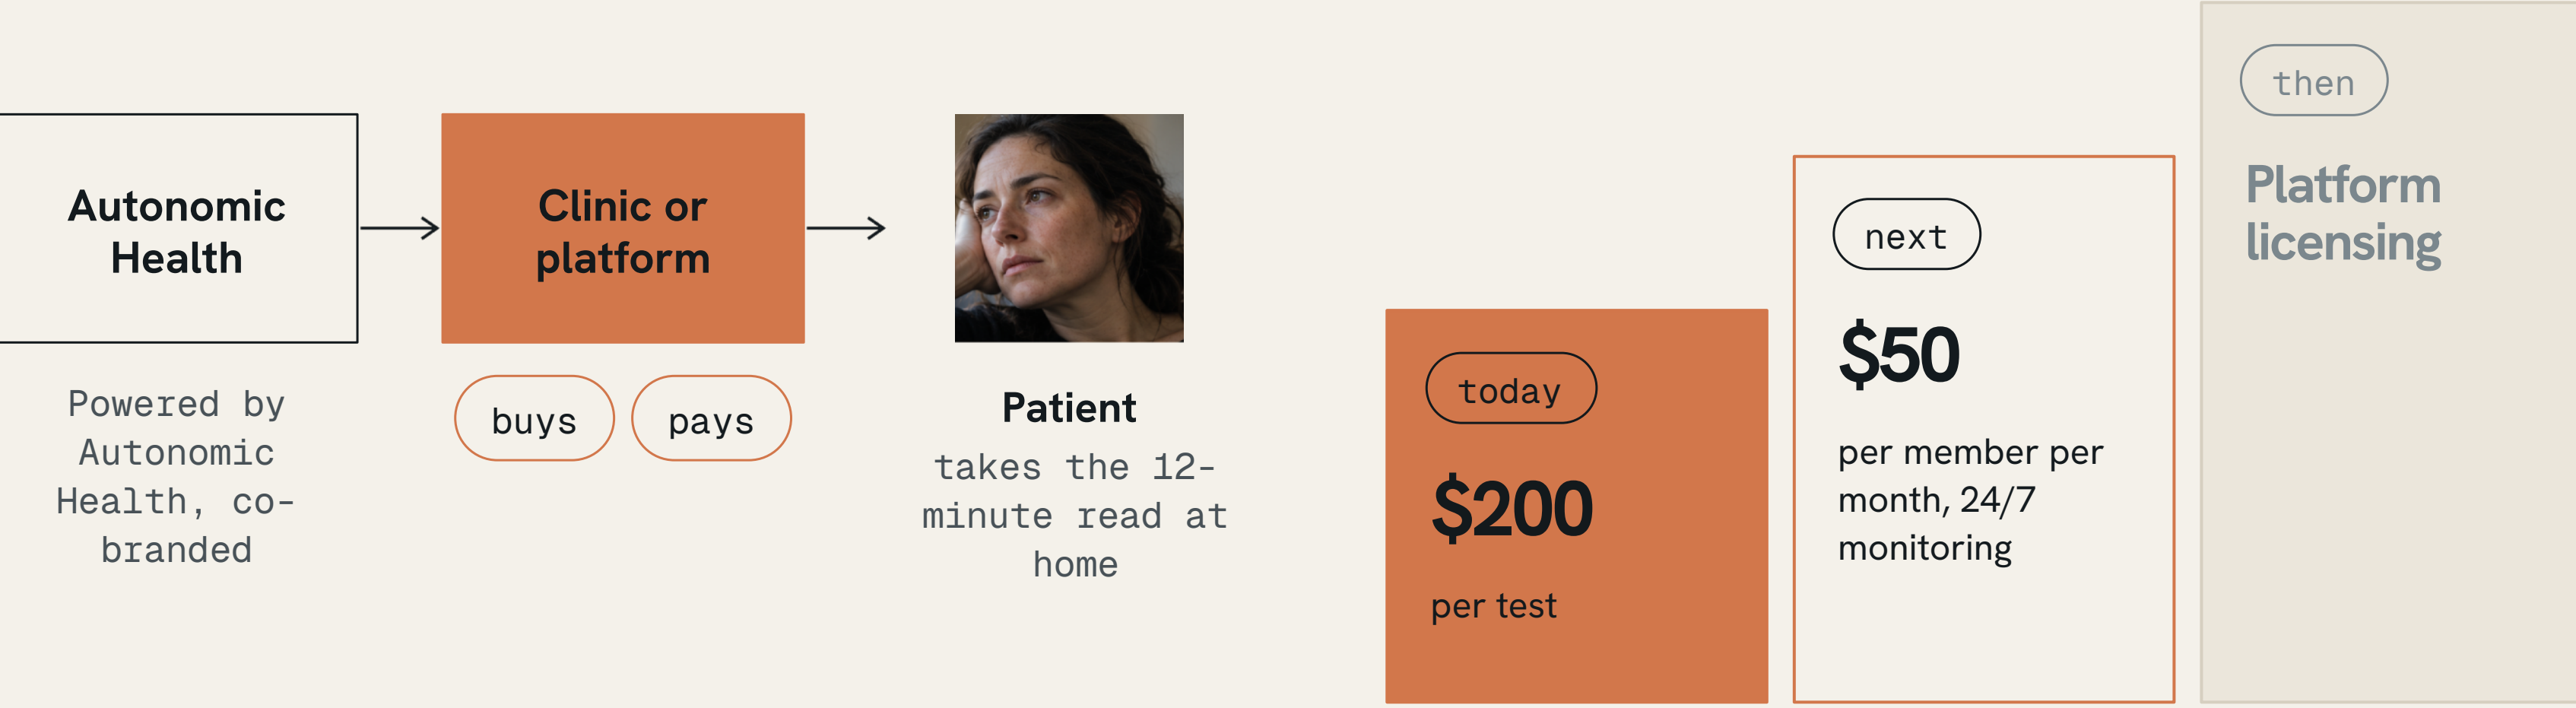

~100%

physicians at our live clinics use
the AI clinician's read and plan

8

Tier-1 platforms in conversation
Mount Sinai · WHOOP · Oura
· Function Health · Hims & Hers

Clinics and platforms that own the patient deliver it.
They pay cash today.

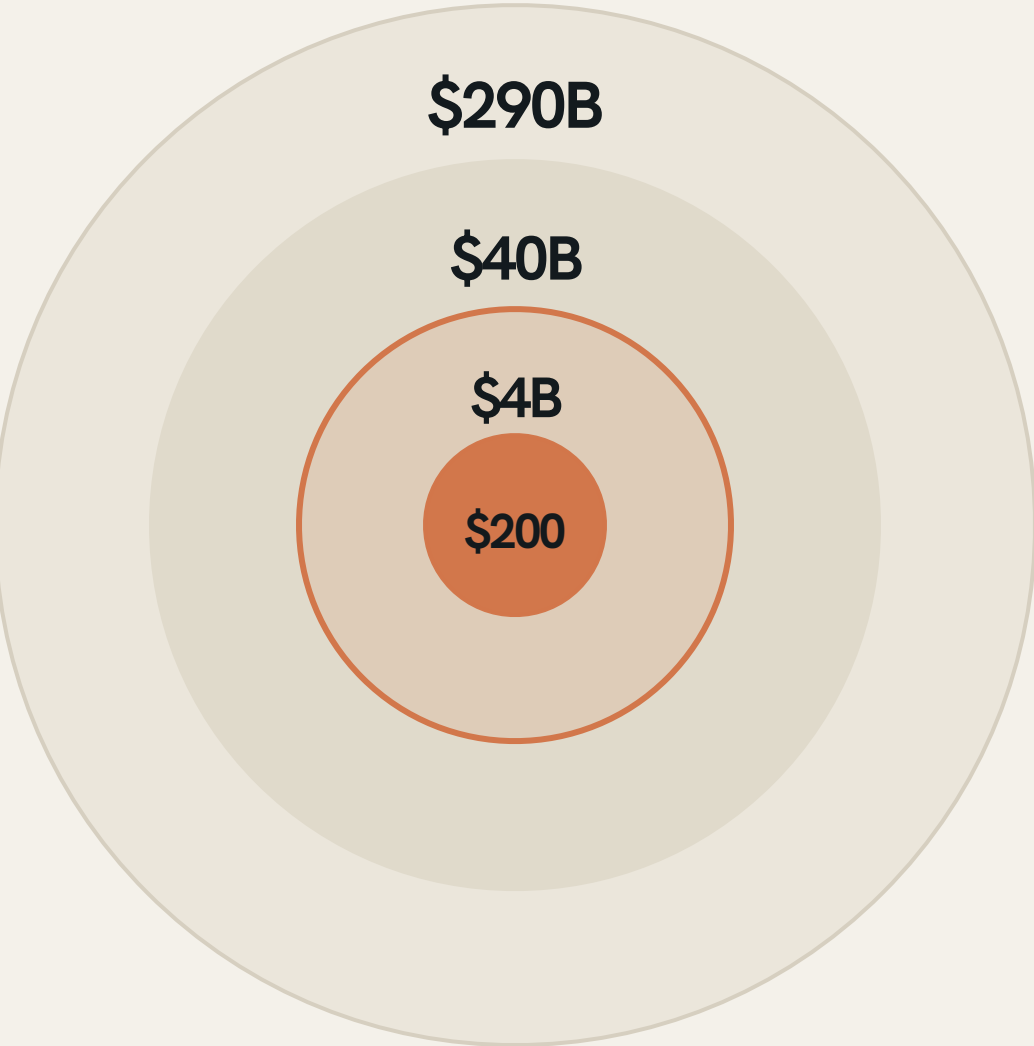

\$800 per complex chronic patient per year (one test plus monitoring)

20 min one CMO call has closed each clinic so far

No reimbursement in the plan: every dollar is cash-pay. The physician makes every call.

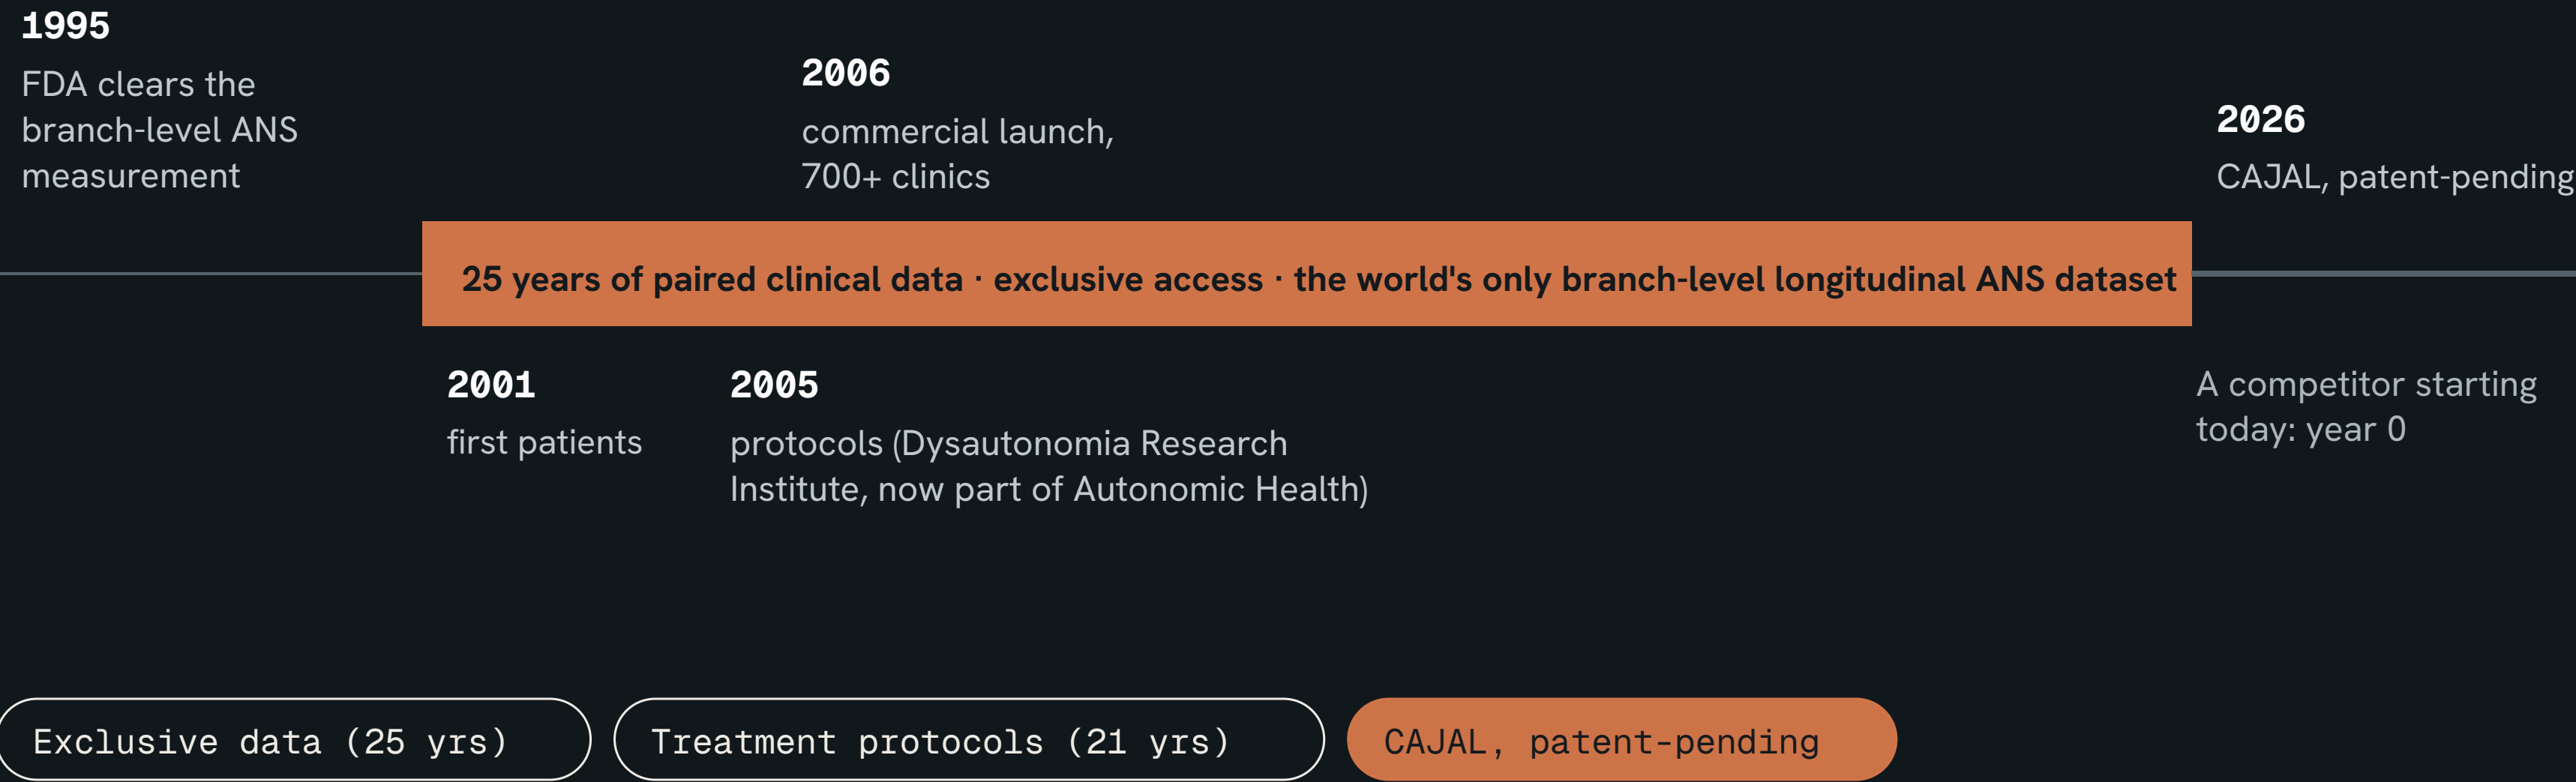

One nervous system, every specialty. **\$290B**
in the US, entered through a **\$200** test.

\$290B	all ANS-driven disease: cardiometabolic, mental health and sleep, women's health, complex chronic
	46 · Heart attack 23 · Anxiety
\$40B	plus women's health · bottom-up
	38 · Fertility
\$4B	wedge: Long COVID, POTS and ME/CFS · 20M US patients
	40 · POTS
\$200	one cash-pay test

One product, ~95% the same in every specialty. Each new specialty is a new intake and report, not a new build.

They have the sensor. We have 25 years of the signal paired with clinical truth, the protocols to treat what it finds, and patent-pending CAJAL to read it on a wearable.
Time is the moat.

Raising a \$5M seed to own the nervous system layer of healthcare.

CEO · CO-FOUNDER
Sab Kanaujia

Operator and 2× exit founder. Led media's shift to real-time personalization, now applying that data playbook to healthcare.

CMO · CO-FOUNDER
Dr. Ramesh Adiraju, MD, FACC

Interventional cardiologist. Built the clinician protocol on the FDA-cleared ANS measurement (2001 to 2006). Two decades of outcomes in heart failure, type 2 diabetes and Long COVID from his practice.

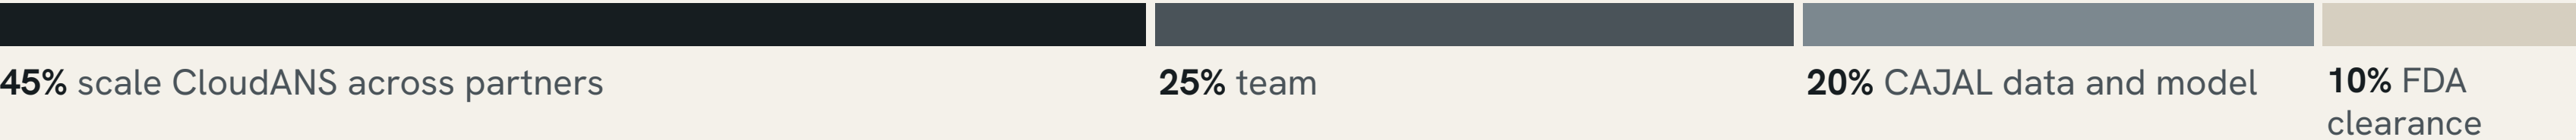

AI HEAD · CO-FOUNDER
Noah Nethery

AI/ML engineer. Architect of CAJAL, our AI model.

Use of funds · what it reaches in 12 to 18 months

18 to 24 months to a Series A

- 20+ customers under contract, clinics and platforms
- 510(k) submitted
- 24/7 monitoring launched

So the next woman who cannot stand gets her answer from the first doctor, not the eleventh.
